**“Where Today’s Machining Challenges
Become Tomorrow’s Technology”**

MULTI-TASK MACHINING

Hybrid & Swiss

Since 1990, we have specialized in the precision machining of component parts utilizing state of the art equipment that are inspected with the latest in video metrology systems.

We are a **niche multi-task machining** company that can machine parts from .005” to 5.00” with innovative methods that reduce overall costs and improve delivery.

We know that our **precision parts** are paramount to your **Quality Products** and are committed to continuously improve our relationship with our valued customers.
